SHARP®

4K Ultra-HD AQUOS BOARD Interactive Displays Promote Collaboration

Whether you are in a classroom or boardroom, Sharp has the tools to allow you to work more productively. With our award-winning 4K Ultra-HD AQUOS BOARD® interactive displays, you can find any size whiteboard for any size budget. Group collaborations are seamless and intuitive. Lectures, presentations and lessons are more creative and engaging.

Features of the PN-C & PN-L Series

- **4K Ultra-HD Resolution:** Capture the fine details of still and video images, as well as small text and complex graphics. It's an ideal large-scale monitor for professional use in a range of environments.

- **Wireless Connectivity:** No need for tangled wires or adapters. Simply touch the screen and your portable Windows® or Android™ device will immediately download an app that lets it send images wirelessly to the monitor. Alternatively, front-facing inputs add connectivity convenience.

- **Pen-on-Paper Experience:** When the tip of the touch pen glides across the screen it feels just like a pen on paper, giving a smooth and responsive digital ink experience.

- **Stress-Free Operation:** The following items are built in, alleviating the need for an external PC:

  - Built-in Whiteboard: Take notes and create drawings instantly. Can also be used as digital signage when not being used as a whiteboard.

  - Built-in controller with IWB Launcher: When the main unit is started, the IWB Launcher is displayed automatically. Simply touch the icons on the desktop for instant access to the features you want to use.

  - Overlay Function: Annotate pictures and video to save and share.

- **Digital Signage:** When not being used as a whiteboard, these AQUOS BOARD interactive displays work seamlessly as digital signage for retail space, hospitals, corporate facilities and around campus.
