CYBERSECURITY

Securing Justice: Safeguarding Law Firms

PULSE PROTECT

THE CHALLENGE

Law firms are increasingly being targeted because they are seen as "island hopping organizations," meaning attackers use firms as a way to "hop" to the real target, your clients. Keeping your firm secure can be time consuming and overwhelming.

THE ANSWER

With more than 68 years of office technology experience, Pulse Technology is well-equipped to safeguard your data and ensure your firm remains secure, freeing you to concentrate on more vital aspects of your operation.
Our cyber certifications include:

- Certified Information Systems Security Professional (CISSP)
- Certified Information Security Manager (CISM)
- SANS GCIA Silver: Intrusion Detection In-Depth

CYBERSECURITY SERVICES

- Penetration Testing, Dark Web Scanning, & Vulnerability Management
- 3rd Party Risk Assessments
- Total Security
- Emergency Response Planning
- Security Information & Event Management (SIEM)
- Managed Security
- End Point Detection & Response
- Security Awareness Training
- Email Encryption, Journaling, & Spam Protection
- Secure Remote Workers/Secure Wifi
